PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 10+ years of experience across e-commerce, fintech, healthcare, and public-sector applications. Builds Cypress and Playwright frameworks from the ground up, leads automation and regression testing, and validates applications across UI, API, and database layers. Combines release engineering and migration QA with hands-on AI product development and Codex-assisted QA workflows.

TECHNICAL SKILLS

Automation and testing: Cypress, Playwright, Selenium WebDriver, Pytest, Appium, Cucumber, Nightwatch.js; E2E, API, regression, UAT, SAP, accessibility, mobile, cross-browser

Development and data: JavaScript, TypeScript, Python, Java, SQL, PHP applications, React, Next.js, Node.js

Delivery and quality: GitHub Actions, GitLab, CI/CD, AWS, Docker, Unix, Postman, JMeter, Lighthouse, Jira, Rally; AI-assisted QA, Codex, AGENTS.md, custom reporting

PROFESSIONAL EXPERIENCE

BSN SPORTS

Senior QA Automation Engineer | Feb 2024 - Present

- Built a Cypress end-to-end test automation framework from scratch and lead automation and regression testing for e-commerce applications.
- Drive QA for migration from Magento to a custom Next.js and React application, validating functionality and regression behavior throughout the transition.
- Perform SAP, accessibility, SQL database, and PHP application testing to validate business workflows across front-end and back-end systems.
- Develop QA AI-agent workflows with Codex and repository-level AGENTS.md instructions; built a custom reporting tool to support QA visibility.
- Work with AWS and GitHub DevOps pipelines to support production deployments and coordinate release validation.

NEW YORK CITY FIRE DEPARTMENT

Software Developer in Test | Aug 2023 - Jan 2024

- Built a Playwright JavaScript E2E framework for internal React applications, reducing testing effort by 40%.
- Configured GitHub Actions to run tests on deployment pushes; combined Postman API validation, test-data setup, manual testing, and regression coverage to support production releases.

SELECTED AI AND DEVELOPMENT PROJECTS

Flobits Mix | flobits.app

Built a music-production application end to end with a 16-step sequencer, mixer and effects, vocal recording, and audio conversion.

Sparkbooks | mysparkbooks.com

Built an AI-powered personalized storybook application end to end with illustrations, audio narration, digital previews, and PDF downloads.

PROFESSIONAL EXPERIENCE CONTINUED

FLORIDA BLUE

QA Automation Lead | Nov 2022 - Jul 2023

- Led QA for a React cost-tool application, building Playwright automation and converting manual scenarios into repeatable E2E tests.
- Owned regression and API testing, release test data, Rally defect triage, and stakeholder reporting; partnered with developers on root-cause analysis.

RIVIERA PARTNERS

Senior QA Automation Engineer | Nov 2021 - Aug 2022

- Built a Cypress framework with TypeScript and Node.js, custom reporting, and daily E2E execution through CI/CD.
- Combined back-end, API, and load/performance testing with requirements reviews, test-case sign-off, release planning, and production deployment support.

CELSIUS NETWORK

Senior QA Automation Engineer | Mar 2021 - Oct 2021

- Established QA processes for a fintech lending platform; built Selenium WebDriver and Python/Pytest automation integrated with Selenium Grid and continuous delivery.
- Validated APIs and SQL data; used JMeter and Lighthouse for load and performance testing across web and mobile experiences.

tZERO

Senior QA Automation Engineer | Oct 2018 - Sep 2020

- Built Cypress automation for Node.js and React capital-markets applications; validated APIs, responsive layouts, and mobile workflows.
- Established Google Cloud testing pipelines and converted manual test cases into repeatable regression automation.

JPMORGAN CHASE

Senior QA Automation Engineer | Dec 2017 - May 2018

- Developed Selenium WebDriver automation using Cucumber and data-driven testing; added Appium mobile coverage and SQL/Unix validation for a customer-facing banking application.

INRHYTHM | CLIENT: ANHEUSER-BUSCH INBEV

Senior QA Automation Architect | Oct 2016 - Nov 2017

- Created a Nightwatch.js framework for Node.js/AWS e-commerce applications with BrowserStack and scheduled CI runs; added Appium mobile testing, reporting, SQL checks, and UAT support.

VERIZON

Senior QA Automation Engineer | May 2016 - Sep 2016

- Automated AngularJS financial-budget workflows with Protractor and Selenium; validated front-end behavior and back-end data using SQL and Unix.

OVERSTOCK.COM

Software Quality Assurance Tester | Aug 2013 - Apr 2016

- Tested e-commerce recommendations and search with Selenium, REST API checks, SQL, Oracle, Hadoop, and Solr; created manual and automated smoke, regression, and UAT coverage.

EDUCATION

Bachelor of Arts in Economics | Rutgers University-Newark | 2011
